ONLINE PROCUREMENT

Source-to-Pay Software
All-in-one eProcurement solution for Businesses

End-to-end process to manage purchasing

Source-to-Pay allows to fully digitalize procurement processes and assure better performances for Buyers in terms of overall costs, procurement teams' performances, and management of admin procedures.

Thanks to comprehensive management of procurement procedures **all orders and suppliers** are optimized. The positive impact of such a smart S2P management solution can be spotted when the software solution is complete and can rely on a unique database.

Source-to-Pay software developed for the most demanding Customers

DigitalPA, leader in procurement software solutions for over twenty years, supports organizations in developing their potential and optimizing purchasing processes. Online Procurement is the modular solution for the complete management of Source-to-Pay processes in your company.

Steps you will be able to manage: preliminary analysis, management of purchasing categories, suppliers and orders, contract, and invoicing.

Accelerate your business and trigger progress

Gain 100% visibility on Company suppliers and spending

Reduce costs of spend management, improve processes and decisions by identifying the best suppliers and new savings opportunities starting from an accurate analysis of spending.

Connect all players in the buying process

Online Procurement integrates a powerful communication tool with a role-based approach for the full connection of all professionals involved.

Focus on strategic activities

Automate manual processes and allow your employees to focus on strategic initiatives that generate real value for the Company.

Improve legal and contracts compliance

Ensure transparent, secure, ethical, and sustainable supplier relationships with flexible workflows. Thanks to activities verification integrated into the system you can prevent errors.

Equip your Company with the most innovative technology on the market, now and in the future

New updates of the Online Procurement platform are regularly released by DigitalPA, with no need for intervention by your company's IT department.

Start now to optimize Source-to-Pay processes

Quick and cutting-edge setup to ensure competitiveness.

e-Sourcing

Manage negotiation events through optimized workflows, manage supplier onboarding and evaluate offers thanks to a powerful analysis and comparison system.
Proposal comparison can be run using selected criteria to optimize purchasing price and mitigate risks.

e-Catalog

Create and manage one-click POs thanks to an advanced search engine and a quick comparison of price lists and product sheets customizable according to your company sourcing strategy.
Purchasing through the e-Catalog guarantees the cost saving thanks to defined standards applied to spending visibility.

Supplier Management

A single tool to improve collaboration and create valuable relationships with your suppliers: from the scouting and qualification phases up to the performance evaluation.

Procurement Intelligence

Identify savings potential in the Source-to-Pay process and achieve high performance by analyzing supplier performances.
Our cutting-edge platform allows you to process data in an intuitive dashboard gaining optimal purchasing planning.

Strategic Purchasing

Plan your Company's spend management goals: collect business needs, generate purchasing strategies and gain full budget control.

Automating sourcing procedures creation and management you will able to reduce costs.

Contract Management

Smart data setup and an integrated communication tool with suppliers assure complete management of contracts.
Contract Management includes advanced monitoring tools, integrated notifications, and contract provisions evaluation, to gain full control and reduce risks.

Interconnect your Company's IT systems

"In the complex world of procurement, DigitalPA has been able to make a difference"

Integration System as...

→ **Connection** with a wide range of third-party services, including ERP systems via API, web-service, SSO, and other recognized and open standards for data exchange.

→ **Interoperability** between modules allowing the complete flow of data interchange.

→ **Integrated management** of authentication and authorizations for role-based access to features and content.

→ **Flexibility** and perfect blending of the tool to needs in different industries.

Improve communication and actively collaborate with your suppliers

Internal communication between stakeholders and external communication with suppliers is essential to accelerate the purchasing cycle and gain consistent savings advantages.

Forget fragmented communication: an advanced management system for messages is integrated with **notifications and email** which alert suppliers, who will be able to interact with Buyers through their dedicated area in Online Procurement.

The software also includes an internal communication system, which faithfully replicates the company organization chart and allows effective information sharing across different departments and professionals involved.

# Infrastructure, security, and privacy compliance

DigitalPA is equipped with an ISO 9001 and ISO IEC 27001 certified **Quality and Information security Management System.**

All information and documents available on the platform are stored according to the strictest data confidentiality protocols.
High standards are applied to all processes managed within Online Procurement, including onboarding and tendering phases, in which the secrecy of proposals is key to ensure fair competition and transparency during the assessment.

Each Supplier has a dedicated area available in every Online Procurement platform.

A specific area of the platform is dedicated to proposal sending: featuring an intuitive and easy-to-use interface is designed to avoid errors and provide automatic verification. Moreover, this dedicated area guarantees the security and legal validity of the proposals, according to our exclusive procedure called **Secure Digital Proposal ©**, copyrighted by DigitalPA both nationally and internationally.
